Professional Summary

Artificial Intelligence and Data Science student with strong knowledge in Artificial Intelligence, Data Analytics, Python Programming and Cloud Technologies. Passionate about developing AI-driven solutions through machine learning, prompt engineering and enterprise AI workflows. Hands-on internship experience with synthetic data generation, LLM applications and data analytics. Strong communication, leadership and problem-solving abilities.

Technical Skills

Programming: Python, SQL, HTML, CSS

Machine Learning: KNN Algorithm, Prompt Engineering

Data Analysis: Pandas, NumPy, Matplotlib

Tools: Microsoft Excel, Git, VS Code, Google Cloud, AWS Generative AI

Education

SRM Valliammai Engineering College, Chennai 2023 – 2027

B.Tech – Artificial Intelligence and Data Science | CGPA: 8.57

JRK Global School, Kancheepuram 2021 – 2022

Class XII (CBSE): 81.8% | Class X (CBSE): 89.8%

Experience

Innovation Technology Intern (Stipend-based) | eMudhra, Bangalore Jun 2026 – Jul 2026

- Collaborated with the Innovation Technology team on enterprise AI and data tooling initiatives, contributing to internal workflow improvements.
- Developed a Python-based pipeline using the Groq API to convert unstructured knowledge-base content into structured synthetic question-answer datasets.
- Applied prompt engineering techniques to improve dataset quality, relevance and consistency across multiple knowledge domains.
- Gained hands-on experience with LLM-based enterprise AI development workflows, from data preparation to output validation.

Additional Experience

Snowflake BUILD Meetup Nov 2025

- Attended the event and gained exposure to intelligent data applications, cloud workflows and enterprise analytics practices used in industry.

AI & Analytics Industry Session, Loyola College Dec 2025

- Participated in the session focusing on real-world AI applications, business intelligence tools and industry trends in analytics.

Projects

AI System for Sustainable Shopping (EcoLife) Jan 2026 – Feb 2026

- Developed an AI-powered recommendation system that analyzes product data to identify and suggest eco-friendly alternatives to everyday purchases.
- Designed sustainability evaluation methods and scoring criteria to compare products based on their environmental impact.
- Applied AI and data analysis techniques to process product information and support more responsible, informed shopping decisions.

Food Expiry Detection System Sept 2025

- Built an AI-based concept that tracks food items and predicts expiry timelines to help reduce household food waste.
- Applied machine learning and data processing techniques to analyze item data and generate timely expiry alerts for users.

Hybrid Safety-Aware NLP Chatbot Framework Mar 2026

- Developed an NLP chatbot framework capable of classifying incoming user queries into multiple risk levels based on content sensitivity.
- Implemented ethical AI safeguards within the framework to ensure the chatbot generates secure, responsible and appropriate responses.

Certifications

- Python for Data Science – NPTEL
- LLM Fundamentals – NPTEL
- PERL Programming – IIT Bombay
- Prompt Engineering – Microsoft
- AWS Generative AI Foundations
- Google Cloud Data Transformation
- Data Science & Analytics – HP LIFE
- Data Visualization – TATA Forage
- AI Value Added Course
- SQL (Intermediate)
- Cognos Analytics – IBM
- Google Analytics

Soft Skills

Leadership Roles: School Pupil Leader (SPL), Assistant School Pupil Leader (ASPL), Placement Coordinator, NCC Cadet

Skills: Leadership • Team Coordination • Event Management • Communication & Presentation • Discipline & Organization • Adaptability • Problem-Solving • Time Management
